

Hello. My name is Thomas Tamez and I'm currently a Junior Electrical Engineering Major at Texas A&M University. I would just like to voice my opinion on the issue regarding the deregulation of the various TV/Newspaper/Radio ownership rules.

I am personally against getting rid of these already existing rules.

If these rules are done away with, massive media mergers will occur. I believe competition between companies is healthy for a growing America. America has always based pride in being diverse and open to new ideas. No matter how anyone feels, the fact of the matter is that much of this diversity that America so much loves will be lost.

Thank you for taking the time to read my comment. Have a nice day.
